

Statement about Discoloration

(Calw, October 2017) Börlind GmbH exclusively uses natural dyes to dye your care products. The color of the product can also depend on the ingredients used.

Natural dyes and ingredients can display seasonal, weather-related or environmental discolorations. This means that discoloration can even arise in the manufacturing stage. In addition, natural dyes and ingredients are not colorfast. This means that natural ingredients may lose the intensity of their color over time or through light irradiation.

This does not have an impact on the quality or effectiveness of the products.
